

Installation guide for the Payson Checkout 2.0 module to Magento

Start with a download of the latest version of Magento, when you have finished the installation of Magento then it is time to start the download and installation of the Payson module.

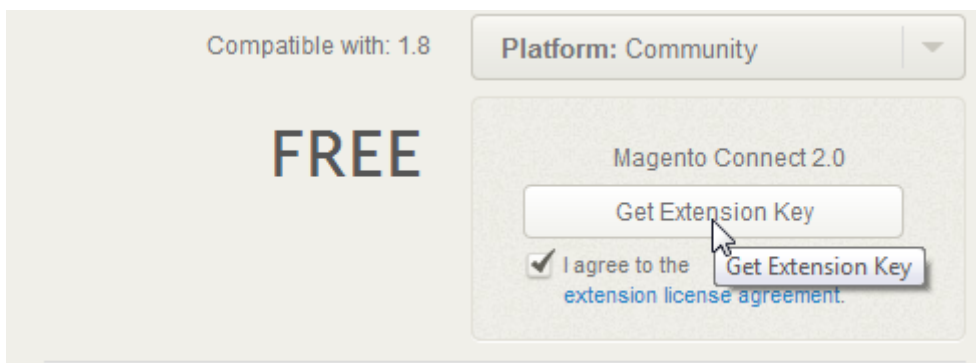

The Payson module can be found on the following page:

<https://www.magentocommerce.com/magento-connect/paysoncheckout-2-0.html>

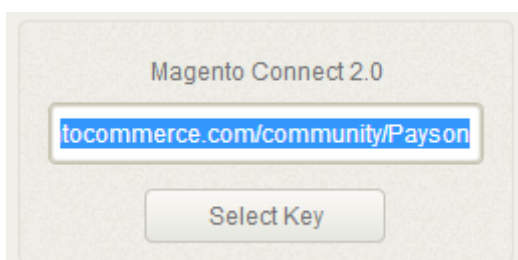

When you have entered that page you should then see a page that looks like the image below, here you need to be logged in to be able to download our extensions to Magento. Click on the Install button.

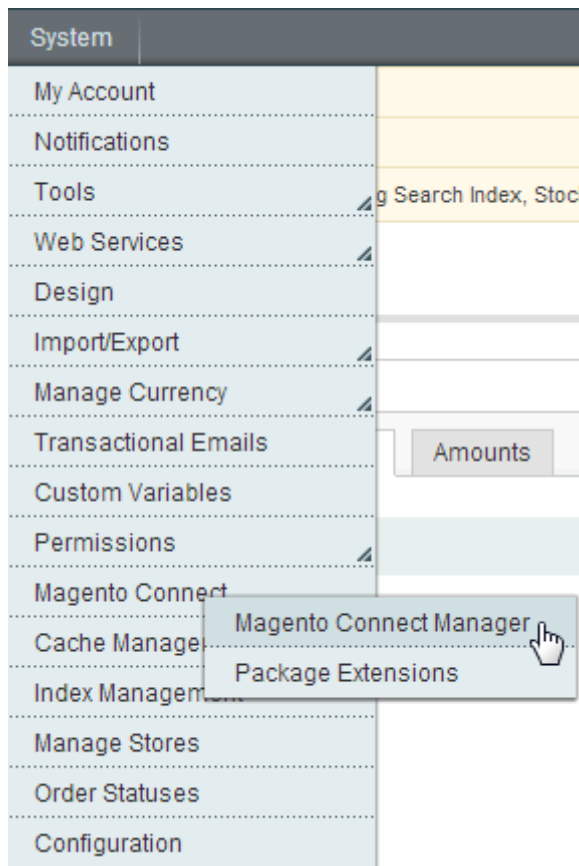

Check the Checkbox that you agree with the license agreement, then click on Get Extension Key

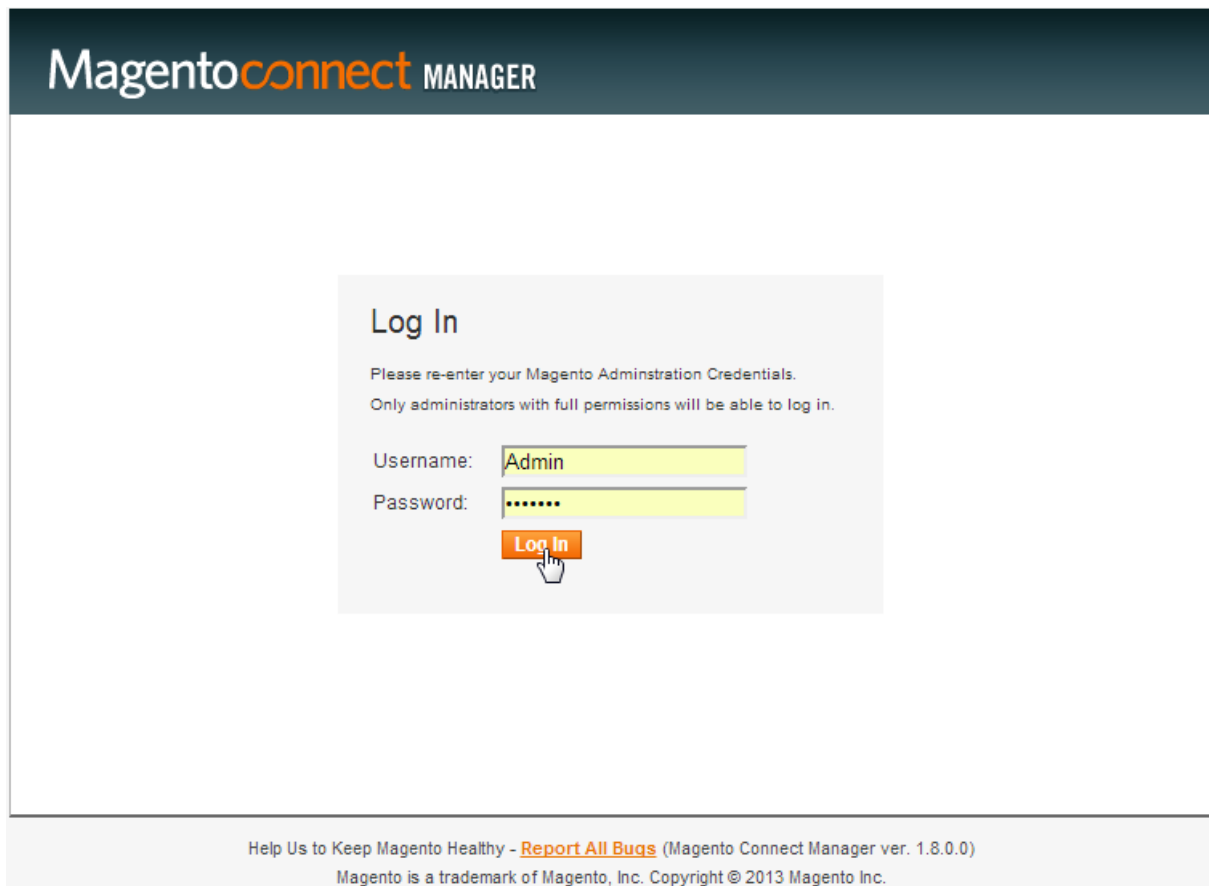

Click on Select Key, then copy the link address.

Now we leave this page and instead returns to our newly installed Magento store, where we choose to enter into the admin pages. When you are logged in as admin, here you hover over the system tab search in this tab for something called Magento Connect, there you can select Magento Connect Manager in a submenu.

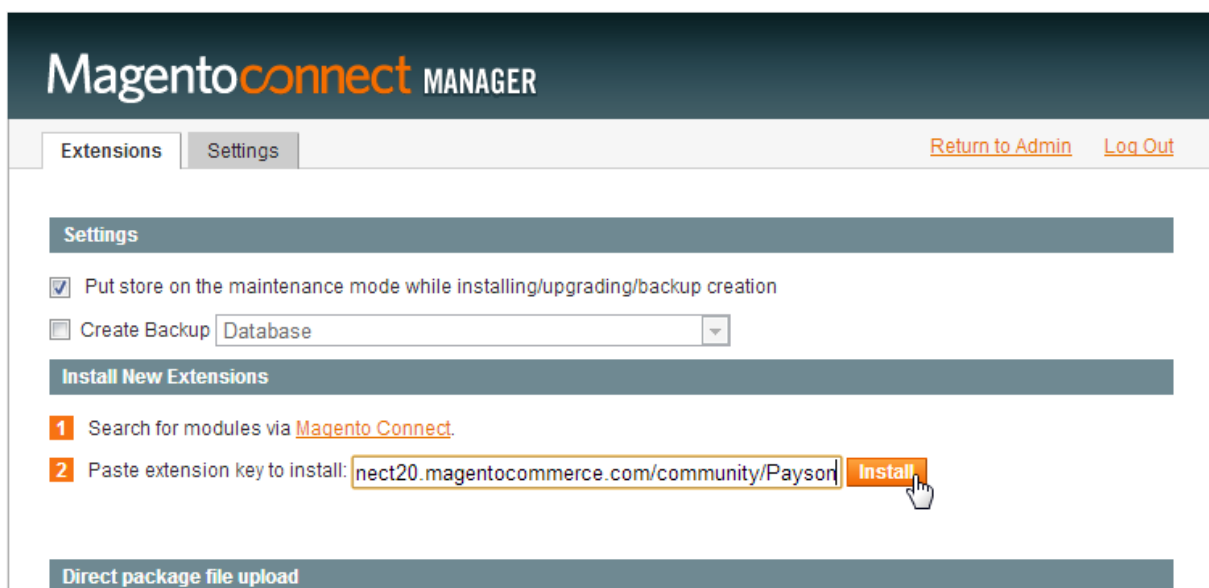

You should now see the page as in the image below, here you must enter your admin credentials for your Magento store.

The screenshot shows the Magento Connect Manager login interface. At the top, there is a dark blue header with the text "Magentoconnect MANAGER" in white. Below the header, the main content area is white. In the center, there is a light gray box titled "Log In". Inside this box, there is a message: "Please re-enter your Magento Administration Credentials. Only administrators with full permissions will be able to log in." Below the message, there are two input fields: "Username:" with the value "Admin" and "Password:" with a masked password ".....". Below the password field, there is an orange "Log In" button with a hand cursor icon pointing to it. At the bottom of the page, there is a light gray footer with the text: "Help Us to Keep Magento Healthy - [Report All Bugs](#) (Magento Connect Manager ver. 1.8.0.0) Magento is a trademark of Magento, Inc. Copyright © 2013 Magento Inc."

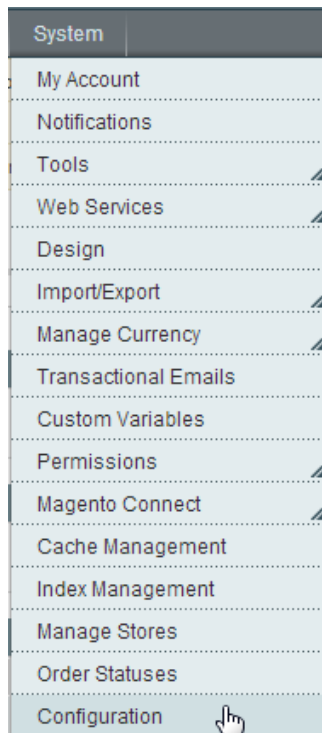

In the page that follows when you have entered the correct credentials it should look as the picture below. Under the headline Install New Extension is where you should paste the link that we collected earlier. Then Click on Install.

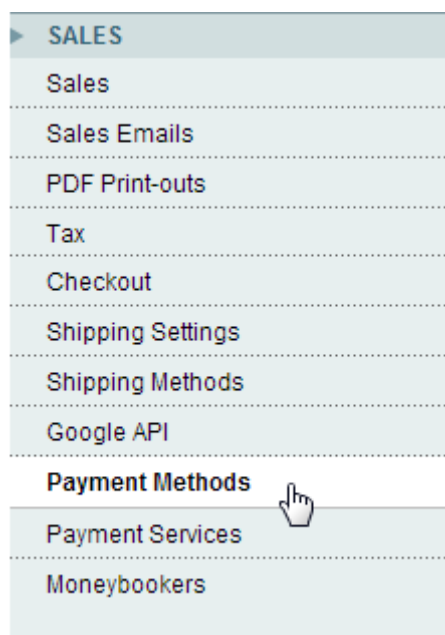

The screenshot shows the Magento Connect Manager interface after a successful login. At the top, there is a dark blue header with the text "Magentoconnect MANAGER". Below the header, there is a navigation bar with two tabs: "Extensions" and "Settings". To the right of the tabs, there are two links: "Return to Admin" and "Log Out". Below the navigation bar, there is a section titled "Settings" with a blue header. Under this section, there are two checkboxes: "Put store on the maintenance mode while installing/upgrading/backup creation" (checked) and "Create Backup" (unchecked). Below the "Create Backup" checkbox, there is a dropdown menu with the value "Database". Below the "Settings" section, there is a section titled "Install New Extensions" with a blue header. Under this section, there are two numbered steps: "1 Search for modules via [Magento Connect](#)." and "2 Paste extension key to install:". Below the second step, there is a text input field with the value "nect20.magentoocommerce.com/community/Payson" and an orange "Install" button with a hand cursor icon pointing to it. Below the "Install New Extensions" section, there is a section titled "Direct package file upload" with a blue header.

Click on the button commit changes, and then click on the link Return to Admin.

When you are back in the admin pages we can start to configure and setup our module. Go to the System tab again and this time select Configuration.

On the left side look for the headline Sales and then click on Payment Methods

Of course you only need to install the payment options that are available for your store. In the configuration below we have input the values for our test server, you shall of course switch these values to your own that you have received from Payson. When you are done click on Save Config.

Payment Methods

[Save Config](#)

Payson Checkout2

Aktiverad	<input type="text" value="No"/>	[STORE VIEW]
▲ Aktivera eller inaktivera betalning med Payson		
Testläge	<input type="text" value="Yes"/>	[STORE VIEW]
▲ Aktivera för användning av testagent		
Agent ID	<input type="text" value="4"/>	[GLOBAL]
▲ Logga in på Paysons webbplats för att hämta ditt Agent ID		
API-nyckel	<input type="text" value="2acab30d-fe50-426f-90d7-8c60a7eb31d4"/>	[GLOBAL]
▲ Logga in på Paysons webbplats för att hämta din MD5-nyckel

▲ Betalningsformuläret kommer att länka till denna URL		
Färgtema	<input type="text" value="Grå"/>	[STORE VIEW]
▲ Betalningsformulärets färgtema		
Extra verifieringssteg	<input type="text" value="Ingen"/>	[STORE VIEW]
▲ Välj ett extra verifieringssteg		
Begär telefonnummer	<input type="text" value="No"/>	[STORE VIEW]
▲ Kräv att användaren fyller i sitt telefonnummer		
Återställ kundvagn vid avbryt	<input type="text" value="Yes"/>	[STORE VIEW]
▲ Återställ kundvagnen när kunden avbryter betalningen		
Återställ kundvagn vid fel	<input type="text" value="Yes"/>	[STORE VIEW]
▲ Återställ kundvagnen när det uppstår ett fel hos Payson		

In the next and final step it is time to install the currency that you will be using. I will show how you should install the Swedish krona, feel free to install something else just remember that the Payson module only supports with Euro or Sek.

Under the headline General in the configuration page click on Currency Setup.

Configuration

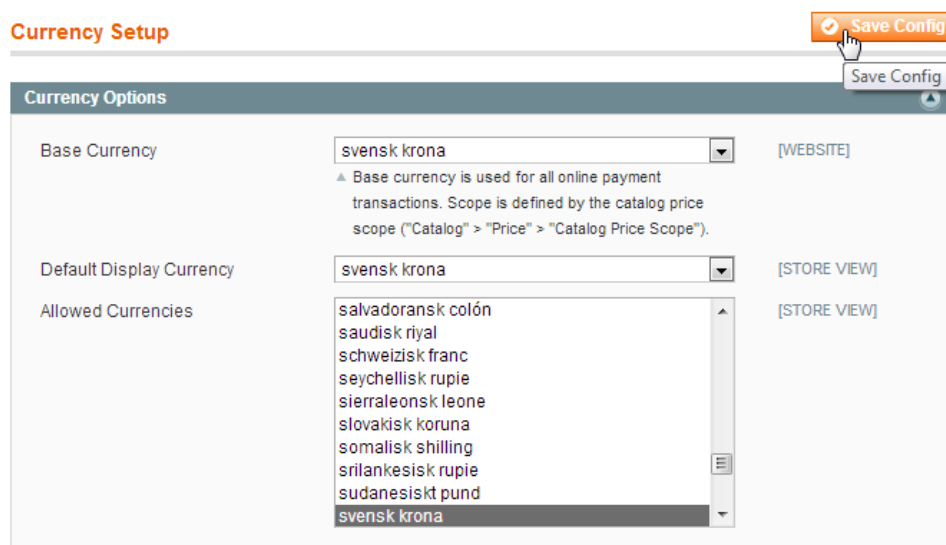

GENERAL

General
Web
Design
Currency Setup
Store Email Addresses
Contacts
Reports
Content Management

Then click on the currency options

Now you only need to search for the your choice of currency in the drop lists, and then click on Save Config

Now all the fundamental steps has been done to get our module to work.

Good luck with your new online store

With regards

Payson Integration
